

# Yair M. Altman

With over 20 years of professional software programming experience in a variety of technical and leadership positions, I offer top-rate MATLAB consulting and training services.

I have worked for many years with MATLAB, as well as other programming languages (Java, C#, C/C++ and many others). I worked extensively with SQL and a variety of databases, operating systems and hardware platforms.

I have completed countless life-cycles of software requirements definition, design, development, documentation, integration, testing, deployment, handover, maintenance and support.

You may already know me from my numerous submissions on the [MATLAB newsgroup](#) and the [MATLAB File Exchange](#), and from my well-known [UndocumentedMatlab.com](#) website. A [MathWorks study](#) has recently found me to be the third most influential submitter on the MATLAB File Exchange. MATLAB community developers, and even MathWorks themselves, consider me as a de-facto guru and one of the most knowledgeable MATLAB developers worldwide, as any simple online search will show.

I published a 700-page [book about MATLAB-Java programming](#) in 2011, which received wide acclaims. My second book, *MATLAB Performance Tuning*, will be published in late 2013.

My main line of business is **consulting** and contract work for clients. With my experience, I provide extremely reliable and professional software, very quickly, for a very competitive cost. In fact, I can do stuff that few other MATLAB programmers in the world know is even possible. My past work and service are [very highly-rated](#) by customers. Most of my revenues come from repeat clients - this attests more than anything else to their level of satisfaction.

I offer preset and custom MATLAB [training courses](#), in a variety of subjects ranging from introductory to highly advanced. Some of my courses are not taught anywhere else, not even by MathWorks. By combining a proven track-record of top-quality professional programming, with 20 years of industry experience, and knowledge that few others possess about MATLAB, my students achieve extremely high MATLAB proficiency levels, highly appreciated in the industry.

I hold a BSc in Physics and MSc in Computer Science from Bar-Ilan University – both with top honors.
